U.S. Patent and Trademark Office PTOL-413 (Rev. 04-03)

### **Summary of Record of Interview Requirements**

#### Manual of Patent Examining Procedure (MPEP), Section 713.04, Substance of Interview Must be Made of Record

A complete written statement as to the substance of any face-to-face, video conference, or telephone interview with regard to an application must be made of record in the application whether or not an agreement with the examiner was reached at the interview.

# Title 37 Code of Federal Regulations (CFR) § 1.133 Interviews Paragraph (b)

In every instance where reconsideration is requested in view of an interview with an examiner, a complete written statement of the reasons presented at the interview as warranting favorable action must be filed by the applicant. An interview does not remove the necessity for reply to Office action as specified in §§ 1.111, 1.135. (35 U.S.C. 132)

#### 37 CFR §1.2 Business to be transacted in writing.

All business with the Patent or Trademark Office should be transacted in writing. The personal attendance of applicants or their attorneys or agents at the Patent and Trademark Office is unnecessary. The action of the Patent and Trademark Office will be based exclusively on the written record in the Office. No attention will be paid to any alleged oral promise, stipulation, or understanding in relation to which there is disagreement or doubt.

The action of the Patent and Trademark Office cannot be based exclusively on the written record in the Office if that record is itself incomplete through the failure to record the substance of interviews.

It is the responsibility of the applicant or the attorney or agent to make the substance of an interview of record in the application file, unless the examiner indicates he or she will do so. It is the examiner's responsibility to see that such a record is made and to correct material inaccuracies which bear directly on the question of patentability.

Examiners must complete an Interview Summary Form for each interview held where a matter of substance has been discussed during the interview by checking the appropriate boxes and filling in the blanks. Discussions regarding only procedural matters, directed solely to restriction requirements for which interview recordation is otherwise provided for in Section 812.01 of the Manual of Patent Examining Procedure, or pointing out typographical errors or unreadable script in Office actions or the like, are excluded from the interview recordation procedures below. Where the substance of an interview is completely recorded in an Examiners Amendment, no separate Interview Summary Record is required.

The Interview Summary Form shall be given an appropriate Paper No., placed in the right hand portion of the file, and listed on the "Contents" section of the file wrapper. In a personal interview, a duplicate of the Form is given to the applicant (or attorney or agent) at the conclusion of the interview. In the case of a telephone or video-conference interview, the copy is mailed to the applicant's correspondence address either with or prior to the next official communication. If additional correspondence from the examiner is not likely before an allowance or if other circumstances dictate, the Form should be mailed promptly after the interview rather than with the next official communication.

The Form provides for recordation of the following information:

- Application Number (Series Code and Serial Number)
- Name of applicant
- Name of examiner
- Date of interview
- Type of interview (telephonic, video-conference, or personal)
- Name of participant(s) (applicant, attorney or agent, examiner, other PTO personnel, etc.)
- An indication whether or not an exhibit was shown or a demonstration conducted
- An identification of the specific prior art discussed
- An indication whether an agreement was reached and if so, a description of the general nature of the agreement (may be by
  attachment of a copy of amendments or claims agreed as being allowable). Note: Agreement as to allowability is tentative and does
  not restrict further action by the examiner to the contrary.
- The signature of the examiner who conducted the interview (if Form is not an attachment to a signed Office action)

It is desirable that the examiner orally remind the applicant of his or her obligation to record the substance of the interview of each case. It should be noted, however, that the Interview Summary Form will not normally be considered a complete and proper recordation of the interview unless it includes, or is supplemented by the applicant or the examiner to include, all of the applicable items required below concerning the substance of the interview.

A complete and proper recordation of the substance of any interview should include at least the following applicable items:

- 1) A brief description of the nature of any exhibit shown or any demonstration conducted,
- 2) an identification of the claims discussed,
- 3) an identification of the specific prior art discussed.
- 4) an identification of the principal proposed amendments of a substantive nature discussed, unless these are already described on the Interview Summary Form completed by the Examiner,
- 5) a brief identification of the general thrust of the principal arguments presented to the examiner,
  - (The identification of arguments need not be lengthy or elaborate. A verbatim or highly detailed description of the arguments is not required. The identification of the arguments is sufficient if the general nature or thrust of the principal arguments made to the examiner can be understood in the context of the application file. Of course, the applicant may desire to emphasize and fully describe those arguments which he or she feels were or might be persuasive to the examiner.)
- 6) a general indication of any other pertinent matters discussed, and
- 7) if appropriate, the general results or outcome of the interview unless already described in the Interview Summary Form completed by the examiner.

Examiners are expected to carefully review the applicant's record of the substance of an interview. If the record is not complete and accurate, the examiner will give the applicant an extendable one month time period to correct the record.

### **Examiner to Check for Accuracy**

If the claims are allowable for other reasons of record, the examiner should send a letter setting forth the examiner's version of the statement attributed to him or her. If the record is complete and accurate, the examiner should place the indication, "Interview Record OK" on the paper recording the substance of the interview along with the date and the examiner's initials.

TO:	Examiner Nguyen (FAX No. 571-273-3159)	
FROM:	Alton Homsby	
DATE;	October 18, 2006	
RE:	Telephone Interview for Application 09/966,300	

## TELEPHONE INTERVIEW OUTLINE

## Dear Examiner Nguyen:

This is a request for a telephone interview to discuss the above-identified case on Thursday October 19, 2006, at 2 P.M. (the undersigned will call the Examiner). The purpose of my request for an interview is to discuss a proposed amendment to independent claim 1 for the purposes of overcoming the rejection the rejection under 35 U.S.C. 103(a) over Wiener (US 6324264) in view of Lamb (US 6474970).

1. (Proposed Amendment) An apparatus for allowing a calling party to initiate a telephone call from an Internet-enabled device, the apparatus comprising a server for receiving an originating telephone number and a destination telephone number in response to a command from the Internet-enabled device wherein at least the destination telephone number is imported from a <u>first</u> database external to the server, for generating a call request, and for transmitting the request <u>from a non-secure data network</u> to a telecommunications network via a secure Internet Protocol network to request the telecommunications network to establish a connection between the originating telephone number and the destination telephone number, wherein the server is in communication with a secure data network and the <u>first</u> database external to the server is in communication with [[a]] <u>the</u> non-secure data network <u>and wherein the server is further</u> in communication with a second database, the second database having stored therein the call request, the call request comprising an Internet Protocol address of the Internet-enabled device.

It is respectfully submitted that the combination of Wiener and Lamb fails to disclose the additional limitations recited above in the proposed amendment of claim 1. For example, Lamb is relied on for allegedly disclosing a PSTN as a "secure network." As recited in claim 1, the secure network (e.g., a second network) is a secure Internet Protocol network (such as a secure intranet) which connects the non-secure network (e.g., a first network) to a telecommunications network (e.g., a third network) — See Fig. 2 in Applicant's specification as an example. The Office Action only states that Wiener discloses 2 networks (not 3 networks), one of which is a PSTN. The Office Action also states that Lamb discloses a firewall between 2 networks and that the firewall can be applied

between a private network and the Internet for enhanced security. However, a firewall is not a network. Therefore, neither of these references discloses a secure network which connects a non-secure network to a telecommunications network. Wiener and Lamb also fail to disclose that a first database external to a server is in communication with the non-secure data network and wherein the server is further in communication with a second database, the second database having stored therein the call request, the call request comprising an Internet Protocol address of the Internet-enabled device. Wiener and Lamb do not disclose a call request which includes an Internet Protocol address of an Internet-enabled device.

Sincerely,

Alton Hornsby, III Registration No. 47,299
